

→ **Client Side (Browser):**

- ◆ User fills out the form in index.php and clicks submit
- ◆ Browser sends the form data to process.php on the server using POST method

→ **Server Side:**

- ◆ PHP receives the form data in the \$\_POST superglobal array
- ◆ process.php processes the data and generates an HTML response
- ◆ Server sends back the HTML page with the submitted data displayed

→ **Browser:**

- ◆ Receives the HTML response from the server
- ◆ Displays the movie information page to the user
